## Course and race description

Approximately 1-mile loop, marked with pin flags, poles, and tape in critical areas.

Rolling with several small berms

Dirt and short grass surface, mud if we're lucky, snow if we're really blessed.

30 corners per lap with multiple twisty sections

One double barrier section per lap with a "no dismount" detour around barriers if so desired.

Race distance for CX race: 8 laps (approx 45 minutes). Race will end when overall leader completes 8 laps - everyone finishes on that same lap.

Staging on start line for CX race: A category (M&F), then B (M&F), then C (M&F). All groups start at same time.

Thorns: Every possible effort has been made to rake all mesquite thorns from course route; however, tubes with sealant and/or tire liners are strongly recommended.

Pit area: Spare wheels and/or an extra bike may be placed in pit area. The pit can be accessed from two sides. If riders have passed the pit and need to change equipment, they must continue around the course until they reach the pits (cannot cut across the course or back-track).
